

## RootBuilder® II HIGH 5™

The **RootBuilder® II** can now be assembled around a root-directing, notched bottom disk to form an oversized #5 container with maximum air-root-pruning efficiency. Sold as a kit which includes sidewall, root-directing container base, and cable ties. This innovation greatly assists handling and creates an unparalleled fibrous root system.

*From seed, 8-month old Black Gum (left) and Shumard Oak (right). Notice yard stick.*

*Look what's inside!*

### **High 5™ Advantages:**

- Uses redesigned **RootBuilder® II** sidewall for greater pruning efficiency.
- 100% of sidewall directs roots to openings.
- Total area of openings is only 6% of sidewall for saving water.
- Funnel angles help to conserve water and reduce evaporation.
- Kit includes 18" sidewall, root-directing base, and cable ties.
- Base has angled ribs to direct roots to openings.
- Creates a highly branched fibrous root system.
- Easy to assemble and remove.
- With new bottom, handles like a #5 but no circling roots.

*Patent Pending*
